QUALITY

At Protect Controls - Quality Is an Instinct

Founded in 1973 Protect Control's devotion to quality has resulted in a worldwide recognition of our superior multifunctional buildings whether is a non-walk enclosure or a large walk-in work area.

PROTECT CONTROLS FACILITY

Our 225,000 square feet of indoor production area are equipped to complete a range of fabrication machining and installation of equipment.

The broad range of capabilities enables us to produce buildings of virtually any size, even within stringent time constraints, handling any size project.

We can complete every aspect of your project in-house.

**PEOPLE + QUALITY
= SATISFIED CUSTOMERS**

Our highly trained personnel are dedicated to maintaining and constantly improving Protect Control's superior quality. From all across the Americas and in the waters in between, Protect Controls is the global leader in the field.

OPTIMAL

Protect Controls - Your Optimal Solution

- 1. LOWER INSTALLATION COST**
Labor and material costs are sharply reduced because the Power Control Building arrives ready for connection.
- 2. MINIMAL START-UP TIME**
Each Power Control Building is checked to assure wiring accuracy, control scheme correctness, and equipment operation prior to shipment.
- 3. INSTALLATION DELAYS REDUCED**
Job sites delays caused by trying to coordinate multiple vendors are eliminated.
- 4. REDUCED PROCUREMENT TIME**
Scheduling and expediting are handled through a single point of contact.
- 5. CUSTOM DESIGN**
Power Control Buildings have a very few restrictions. They can be almost any size, shape or color, and in addition, can include whatever equipment necessary from major equipment vendors such as General Electric, Cutler-Hammer, and Siemens.

MODIFY

Additional Equipment & Modifications

Since each Power Control Building is custom designed, we not only provide the electrical equipment you specify, but we can include any additional equipment and modifications required.

Some examples include, but are not limited to:

- HVAC Systems
- Pressurized Units
- Battery Systems
- Annunciators
- Wireway and Cable Trays
- Communications Equipment
- Security Systems
- Marshaling Cabinets
- Installation and Wiring
- Custom Paint Finishes
- PLC's and Analyzers
- Office or Work Areas
- Plumbing and Rest rooms
- Doors & Windows
- Kitchens
- Computer Flooring Systems
- Bus Ducts
- Any other equipment specified by customer.

VERSATILE

Clear Span Design & Single Module Design
